

Please leave MY satellite radio alone. I get music that I can enjoy listening to. It is wonderful to listen to my Mother-in-law, who has dementia & can't remember what happened five minutes ago, sing along with the 40's Decades station. It makes her feel so good to be able to do this when she's in the car with my husband or myself. I like being able to listen to weather reports in other parts of the country, especially when I'm traveling there.

I truly enjoy the number of music genre's that I can choose from-whatever suits my mood at the time.

PLEASE REJECT THE NAB'S PETITION 04-160.

Thank you
